#### TAGS setup and data collection by Aqdas Malik

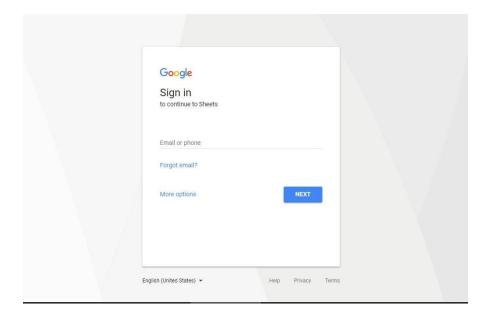

Visit: https://tags.hawksey.info/

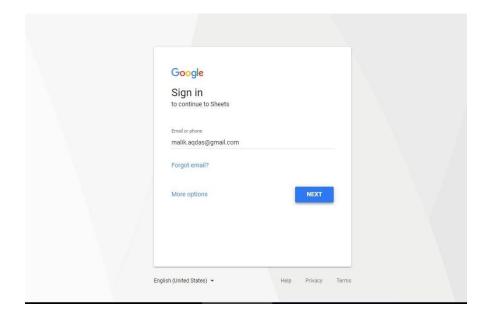

#### Click on "TAGS v6.1" button

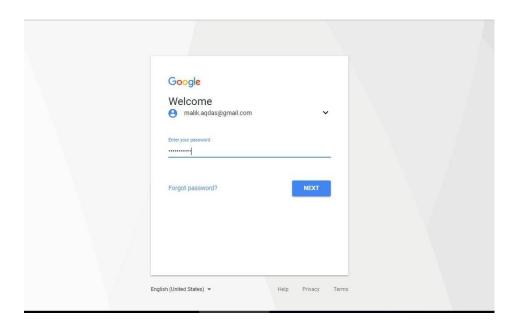

# Google sign in page will appear

# Sign in with your Google credentials

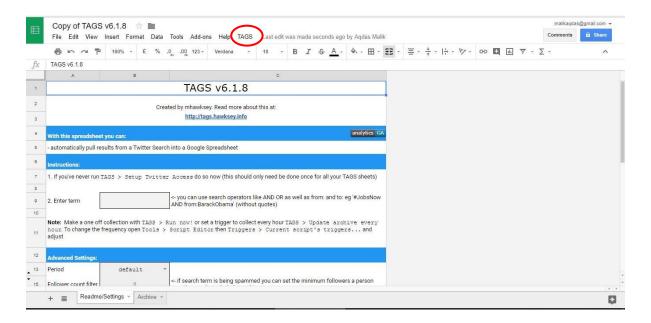

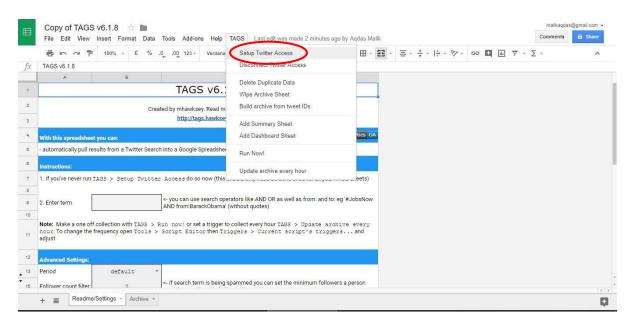

After successful login to Google Drive, click on "Make a copy" button

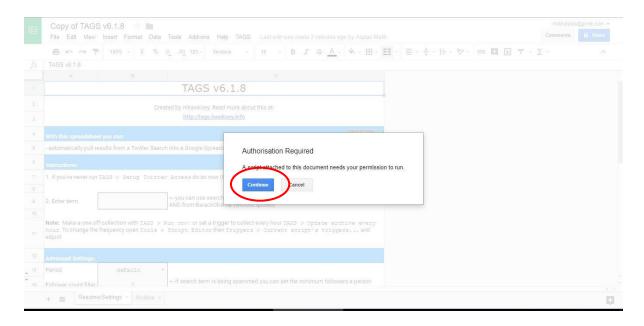

# Wait for the google sheets page to load completely (until the TAGS menu option appears)

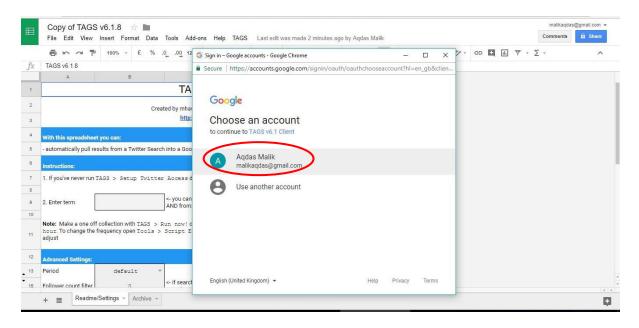

## Choose "Setup Twitter Access" from TAGS option menu

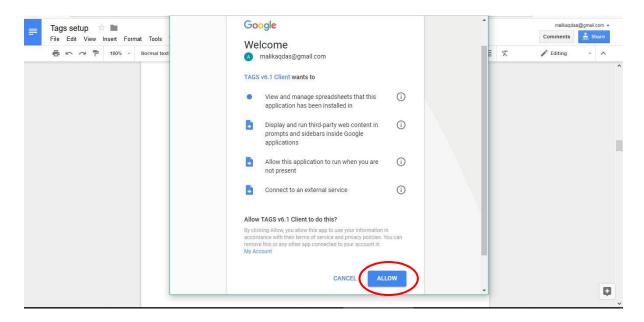

#### Press "Continue" button to authorize the access

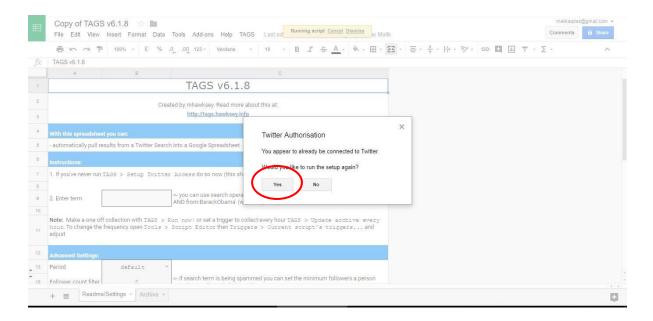

### Select the Google account used earlier

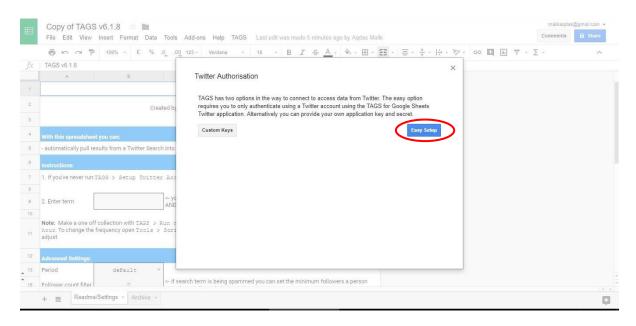

# Select the "Allow" button (if you agree with the access terms)

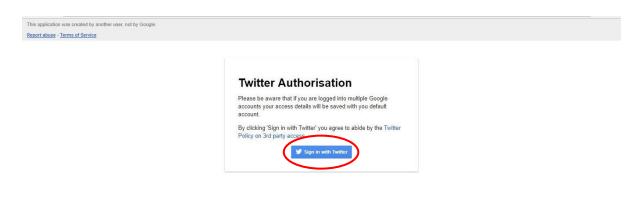

#### Select "Yes" button for Twitter authorization

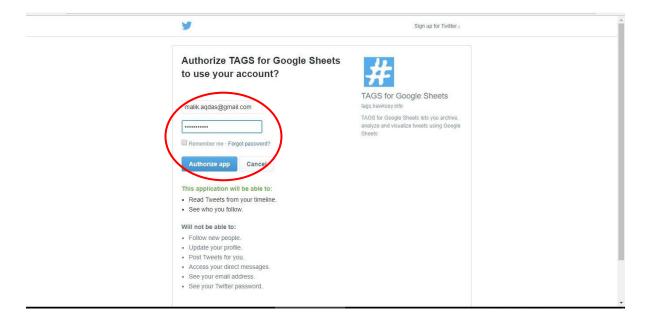

## Choose "Easy Setup" button to continue

## Select the "Sign in with Twitter" button

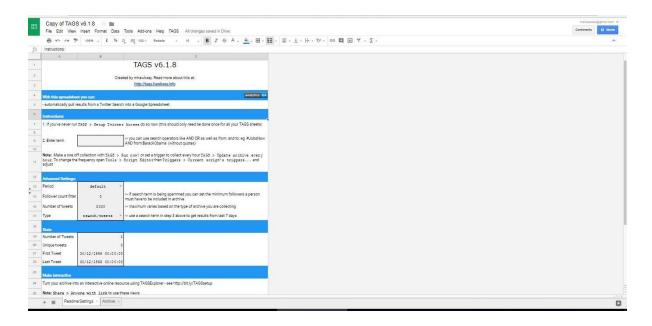

## Provide your Twitter credentials and select "Authorize app" button

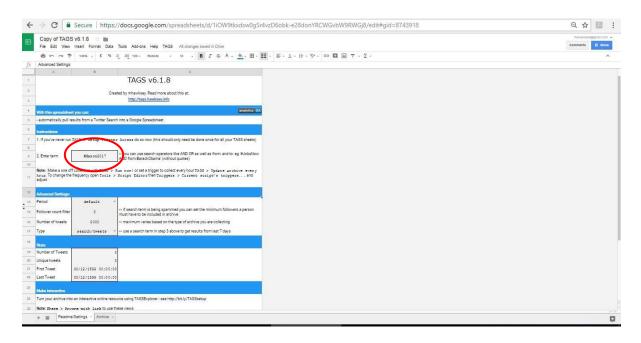

## Close the pop-up window to continue to the TAGS application

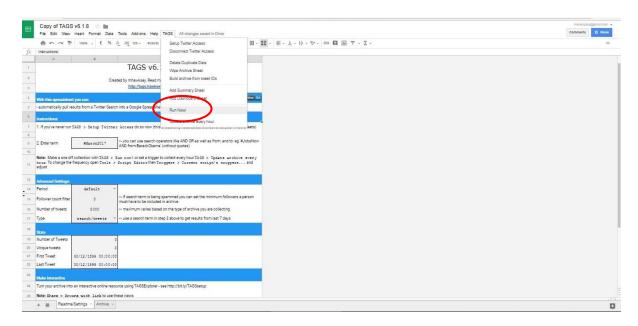

## Tags setup is now complete

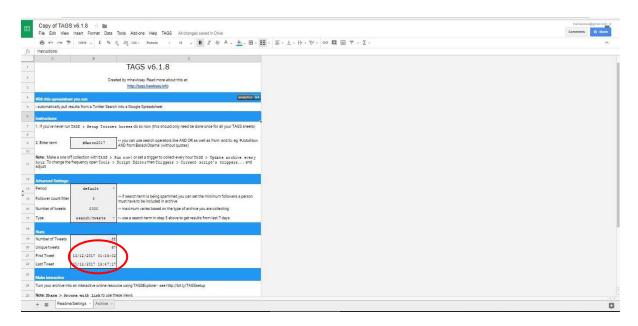

Enter a (or multiple) hashtag (#), keyword, or account/handle (@) Note: Input can also be a combination of hashtags, keywords, or account.

## Choose "Run now" from Tags options menu to initiate data collection

## Data collection is in progress

#### To view the collected data, choose the "Archive" tab
